**MINI PROJECT REPORT**  
**on**  
**IOT BASED AGRICULTURE PROTECTION FROM**  
**WILD ANIMALS**

Submitted in partial fulfillment of the Requirements for the award of

Degree of

BACHELOR OF TECHNOLOGY

in

**Dept. of Electronics & Communication Engineering**

By

SREERAMOJU MADHAN	22681A0454
VARRE BHAVANI	22681A0457
JANNEPALLY SAIDI	21681A0411
YENREDDY TEJASWINI	22681A0428

Under the Esteemed Guidance of

**Mr. B. HANUMANTHU M. Tech**

Assistant Professor

**Dept. of Electronics & Communication Engg.**

**CHRISTU JYOTHI INSTITUTE OF TECHNOLOGY & SCIENCE**

**(Affiliated to JNTU, Hyderabad)**

**2024-2025**

## **Dept. of Electronics & Communication Engg.**

### **Institution Vision and Mission**

#### **VISION**

To admit and groom students from rural background and be a truly rural technical institution, benefiting society and nation as a whole institute.

#### **MISSION**

- The mission of the institution is to create, deliver and refine knowledge. Being a rural technical institute, our mission is to.
- Enhance our position to one of the best technical institutions and to measure our performance against the highest defined standards.
- Provide highest quality learning environment to our students for their greater well-being so as to equip them with highest technical and professional ethics.
- Produce engineering graduates fully equipped to meet the ever-growing needs of industry and society.

  
Principal  
Christu Jyoti Institute of Technology & Sciences  
Colombo Nagar, Yeshwanthapuram (V.M)  
Jangaon(M.D), Jangaon (Dist)-506167.

# **CHRISTU JYOTHI INSTITUTE OF TECHNOLOGY & SCIENCE**

**(Affiliated to JNTU, Hyderabad)**

**Colombonagar, Yeshwanthapur, Jangaon Dist 506167, Telangana**

**2024-2025**

## **Dept. of Electronics & Communication Engg.**

### **Department Vision & Mission**

#### **VISION**

To be an established center of excellence in Electronics and Communication Engineering facilitating youth towards professional, leadership and industrial needs.

#### **MISSION**

- Impart theoretical and practical technical education of high standard with quality resources and collaborations.
- Organize trainings and activities towards Overall personality development in time with industrial need.
- Promote innovation towards sustainable solutions with multi discipline team work with ethics.

**HOD**

## **DECLARATION**

The project entitled "**IOT BASED AGRICULTURE PROTECTION FROM WILD ANIMALS**" is a record of the bonafide work undertaken by us towards partial fulfilment of the award of Degree of **Bachelor of Technology** in Electronics and Communication Engineering, to Christu Jyothi Institute of Technology and Science, Jangaon, affiliated to JNTU, Hyderabad is an authentic work and has not been submitted to any other university or institution for award of the degree.

## **PROJECT MEMBERS**

SREERAMOJU MADHAN	22681A0454
VARRE BHAVANI	22681A0457
JANNEPALLY SAIDI	21681A0411
YENREDDY TEJASWINI	22681A0428

## **ACKNOWLEDGMENT**

We hereby express our sincere gratitude to the **Management of Christu Jyothi Institute of Technology & Science** for their kind encouragement bestowed up on us to do this Mini project.

We earnestly take the responsibility to acknowledge the following distinguished personalities who graciously allowed our project work successfully.

We express our sincere thanks to our director **Rev.Fr. D. Vijaya Paul Reddy**, Principal **Mr. Dr. S. Chandrashekhar Reddy** for their encouragement, which has motivated us to strive hard to excel in our discipline of engineering.

We are greatly indebted to the Head of the Department **Mr. Allanki Sanyasi Rao, Associate Professor** for his motivation and guidance through the course of this project work. He has been responsible for providing us with lot of splendid opportunities, which has shaped our career. His advices, ideas and constant support has engaged us and helped us to get through in difficult times. His excellent guidance has made the timely completion of this Mini Project.

We express our profound sense of appreciation and gratitude to our guide, **Mr. R. Ramesh, Assistant professor** for providing generous assistance, and spending many hours of valuable time with us. This excellent guidance has made the timely completion of this project.

Our heartfelt thanks to our Project Coordinator, **Mr. D. JAGAN, Assistant Professor** for the support and advice for our innovative project he has given us through our project reviews. We also wish to thank them for their guidance and support during our early days in the area of lot.

Last but not the least, we express our gratitude to the Teaching and Non-Teaching Staff of the Department of Electronics and communication for their needy and continuous support in technical assistance.

# ABSTRACT

Agriculture plays a vital role in the economy of many countries, and protecting crops from external threats is essential for ensuring optimal yield and food security. One of the common problems faced by farmers, especially in rural and forest-adjacent areas, is the intrusion of wild animals into agricultural fields. These intrusions often lead to significant crop damage and economic losses. To address this issue, this project proposes an **IoT-based agriculture protection system** that helps in detecting and alerting about the presence of wild animals using a cost-effective and reliable setup.

The system is built using components such as **laser diodes**, **Light Dependent Resistors (LDRs)**, **GSM SIM900A module**, **Arduino Uno**, **buzzer**, and an **LCD with I2C**. Laser beams are aligned with LDR sensors across the periphery of the field. When an animal passes through the setup, the laser beam is interrupted, causing a change in the resistance of the LDR. This disruption is detected by the Arduino Uno microcontroller, which then activates a buzzer to produce an audible alert.

Simultaneously, the system uses the GSM SIM900A module to send an SMS alert to the farmer's mobile phone with the message: "**Animal in field, please check.**" This ensures that the farmer is immediately informed, even if they are not near the field. Additionally, the LCD display connected via I2C shows the message "**Animal Detected**" for on-site monitoring. This project offers a smart, low-power, and automated solution to prevent crop damage by wild animals. It combines basic electronics and IoT technologies to enhance agricultural security, reduce manual monitoring, and improve crop safety effectively.
